

Water softener equipments

Our stainless steel membrane housings are designed to be used in conjunction with reverse osmosis and nanofiltration membranes to deliver high-quality and ultra-pure water for a variety of applications. At Euro-Clear Ltd., we understand the importance of having reliable and efficient water treatment systems, and our stainless steel membrane housings are an excellent solution for achieving this goal.

Features

- Stainless steel 304 or 316L material
- Can be applied to 1-4 RO elements
- High polished exterior
- Chemical compatibility and corrosion resistance
- Easy installation and maintenance
- Withstands high pressure and temperature

Specifications

- Material: SUS304
- End cap material: ABS
- Connection type: G/BSPP
- Max. pressure: 12 bar

Product codes

Part number	Products	Size
BNSS2521/ABS	RO membrane housing	2,5" x 21"
BNSS4021/ABS	RO membrane housing	4" x 21"
BNSS2540/ABS	RO membrane housing	2,5" x 40"
BNSS4040/ABS	RO membrane housing	4" x 40"

Certifications

All stainless steel membrane housings are ASME, CE and ISO certified.
